For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

## **NEW HOUSES SOLD AND FOR SALE**

This report provides statistics for new privately owned one-family houses sold and for sale. The U.S. Census Bureau and the U.S. Department of Housing and Urban Development jointly release this report.

Sales of new one-family houses in October 2000 were at a seasonally adjusted annual rate of 928,000 compared with the revised September rate of 953,000. The October 1999 rate was 906,000.

The median sales price of new houses sold in October was \$174,900; the mean sales price was \$218,400. Changes in median and average sales prices often reflect changing proportions of houses with different locations, sizes, etc., as well as changes in the prices of houses with identical characteristics. For a measure of the change in the sales price of new houses sold which are the same with respect to important characteristics, refer to the price index found in tables 7b and 8 of this report. Table 7a presents the Fisher Ideal chain-type annual-weighted index in which no characteristics are held constant. For a description of these indexes see the appendix in the March 1997 issue of this report.

The seasonally adjusted estimate of new houses for sale at the end of October was 317,000. This represents a supply of 4.2 months at the current sales rate.

Through October of this year, there were 777,000 houses sold compared with 785,000 for the same period last year. This is a decrease of 1 percent.

## **EXPLANATORY NOTES**

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting. Estimated average relative standard errors for preliminary statistics for houses sold and for sale are shown in the tables. For monthly estimates they are based upon the latest 6-month period ending June or December (January-June or July-December). Quarterly estimates are based upon the more recent of the first 2 quarters or last 2 quarters of the most current year; annual estimates on the last 2 years.

For month-to-month comparisons of total houses sold, the range of the 90-percent confidence interval is  $\pm 9$  percentage points from the estimated change. For year-to-date comparisons, the range is  $\pm 3$  percentage points.

When the range of the confidence interval contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant.

In interpreting changes in the statistics in this report, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It takes 4 months to establish an underlying trend for new houses sold. Preliminary estimates of new sold are subject to revision due to the survey methodology and definitions used. The survey is based primarily on a sample of houses selected from building permits. Since a "sale" is defined as a deposit being accepted or a sales contract being signed, the sale can occur prior to the issuance of the building permit. An estimate of these prior sales is included in the sales figure. On average, the preliminary seasonally adjusted estimate of total sales is revised  $\pm 3$  percent. This does not include the revisions made when new seasonal factors are computed.

HUD-coded manufactured homes are not included in these statistics. Data for these homes can be found on the internet at:

[www.census.gov/const/www/mhsindex.html](http://www.census.gov/const/www/mhsindex.html)

For more information about these data contact the Construction Expenditures Branch, Manufacturing and Construction Division, U.S. Census Bureau, Washington, DC 20233-6900. Telephone: 301-457-1605.

Historical statistics on new one-family houses sold and for sale from 1963 to date are available on the internet at:

<sup>p</sup>Preliminary. <sup>f</sup>Revised.

<sup>1</sup>Houses for which sales price was not reported have been distributed proportionally to those for which sales price was reported.

<sup>2</sup>Total equals 100 percent.

Note: The sales price includes the land.

**Table 5. Current Seasonal Factors**

Month and year	New houses sold				New houses for sale	Months' supply at current sales rate	Median months from start to—	
	United States implicit factor	Northeast	Midwest	South			Sale	End of month
2000: July <sup>r</sup> .....	104.0	99.3	107.3	104.6	102.2	99.1	95.4	94.6
August <sup>r</sup> .....	104.9	108.7	104.0	105.1	104.0	99.9	93.7	89.7
September <sup>r</sup> .....	94.7	98.9	93.2	95.1	93.9	100.0	103.5	92.5
October <sup>p</sup> .....	91.6	87.7	93.2	91.1	93.1	100.9	107.3	95.8

<sup>p</sup>Preliminary. <sup>r</sup>Revised.

Note: These are the seasonal factors used to adjust the most current preliminary and revised estimates. The factors are produced by running each series through the X-12 ARIMA seasonal adjustment program. For new houses sold, only the four regional series are run through this program. The resulting seasonally adjusted estimates are then added to produce an estimate for the United States. The implicit factor is the result of dividing the unadjusted estimate by the seasonally adjusted estimate. It provides an indication of the overall seasonality for the particular month.

**Table 6. Median Number of Months on Sales Market**

[Houses not started are excluded. Medians computed from unrounded figures]

Period	Houses sold, measured from month of start		Houses for sale		Period	Houses sold, measured from month of start		Houses for sale			
			Measured from month of start	Measured from month of completion (not seasonally adjusted)				Measured from month of start	Measured from month of completion (not seasonally adjusted)		
	Not seasonally adjusted	Seasonally adjusted	Not seasonally adjusted	Seasonally adjusted		Not seasonally adjusted	Seasonally adjusted	Not seasonally adjusted	Seasonally adjusted
